

# MCR SAFETY GLOVES WITH BUILT-IN SANITIZED® HYGIENE FUNCTION FOR MATERIAL PROTECTION

MCR Safety has been using Sanitized® treatment on their gloves for decades. The treatment with Sanitized® additives has a long-lasting effect towards maintaining the freshness and comfort of the gloves by reducing bacterial odors. Almost all\* MCR Safety gloves with a textile liner (so-called 'supported gloves') for repeated use, are treated with Sanitized® antimicrobial material protection.

\*Excluding a small group of products. Please discuss with your sales representative for more information.

The treatment with the Sanitized® hygiene function has a durable effect towards maintaining the quality of the glove's material by reducing bacterial odors and microbes on the material in order to protect the material. The Sanitized® hygiene function retains its effect as long as the coating remains intact.

The Sanitized® treated gloves are more sustainable. Thanks to the included durable antimicrobial material protection, MCR Safety gloves stay fresh and give you peace of mind. The gloves last longer and have to be replaced less frequently.

## SOME OF MCR SAFETY'S SANITIZED®-TREATED GLOVES THAT ARE GREAT FOR A VARIETY OF APPLICATIONS:

**Ninja® BNF**  
with Breathable  
Nitrile Foam  
Precision Handling,  
Automotive Assembly,  
Shipping and Receiving

**Dyneema®  
Diamond**  
with PU  
Maintenance,  
Handling sharp  
edged objects, Steel  
Industry, Automotive

**Cut Pro®**  
with Silicone  
Window and  
door fabrication,  
Manufacturing,  
Hot melt and  
sealant work

**Predator®**  
Nitrile Series  
Petrochemical, Lumber,  
Recycling, Construction  
Industries
